Use case matrix

90-day roadmap

Governance

Module 1 — Use Case Prioritisation Matrix

Use Case	Time saving	AI reliability	Priority
Variance commentary drafting	High	High	Start here
Budget challenge preparation	Medium	High	Wave 1
Scenario narrative drafting	Medium	High	Wave 1
KPI dashboard commentary	High	Medium	Wave 2
Reforecast assumption documentation	Medium	High	Wave 2
Full-year forecast modelling	High	Low	Wave 3

Module 2 — Prompt Engineering Standards

THE R.C.T.F. FRAMEWORK

Every finance AI prompt should include: **Role** (who the AI is writing as), **Context** (financial data and audience), **Task** (what to produce with word count), **Format** (structure, banned phrases, output requirements).

Mandatory elements for financial reporting prompts:

- ✓ State the audience — this is the single highest-impact variable
- ✓ Specify word count — 'concise' is not a constraint; '120 words' is
- ✓ Include banned phrases list — filler language degrades output quality predictably

- ✓ State 'do not perform calculations' for prompts involving numbers
- ✓ State 'do not speculate beyond the data provided' for forward-looking sections

Module 3 — AI Tool Evaluation Criteria

Criterion	What to test	Red flag
Numerical accuracy	Paste a P&L table and ask for variance calculations. Verify every number.	Any calculation error
Hallucination rate	Ask for commentary on a dataset with deliberate gaps. Check if model invents causes.	Model invents business reasons not in the data
Instruction adherence	Set a 40-word limit. Check compliance across 10 test runs.	Consistent failure to respect word limits
Data privacy	Review data retention policy. Confirm whether inputs are used for model training.	Inputs used for training without opt-out

Module 4 — 90-Day Transformation Roadmap

Phase	Focus	Success metric
Days 1-30: Foundation	Select 1 AI tool. Build prompt library for variance commentary. Train team on R.C.T.F. Establish output review protocol.	Team produces reviewed AI commentary for first month-end close
Days 31-60: Expansion	Add budget challenge and scenario narrative prompts. Measure time saving vs pre-AI baseline.	Average time per commentary task reduced by 30%+
Days 61-90: Governance	Document AI usage policy. Present ROI to Finance Director. Plan Wave 2 use cases.	AI governance policy approved and team trained

About This Resource

Developed by **Mirela Dragulescu**, a finance transformation specialist with 9+ years delivering FP&A process improvement and AI adoption programmes across European finance functions.
