HOW TO USE THIS ASSESSMENT

This works two ways: have each team member complete it independently and average the results, or work through it together as a facilitated team discussion. If completing it individually, collect responses anonymously — people rate psychological safety more honestly when their name isn't attached to the answer, which is itself a useful signal if they hesitate.

RATING SCALE

Rate each statement from **1 (Strongly Disagree)** to **5 (Strongly Agree)**, based on how the team actually operates — not how you'd like it to operate. Answer all 15 questions before moving to the scoring guide.

Psychological Safety

Whether people feel safe to speak up, take risks, and be honest with each other

1

Team members feel safe to speak up, disagree, or challenge ideas without fear of embarrassment or retaliation.

1

2

3

4

5

Strongly disagree

Strongly agree

2 Mistakes are treated as learning opportunities rather than reasons for blame.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

3 People on this team ask for help when they need it, rather than struggling alone.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

4 It's safe to admit "I don't know" or "I was wrong" in front of this team.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

Accountability

Whether commitments are kept, roles are clear, and issues are addressed directly

5 Team members follow through on commitments they make to each other.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

6 When something goes wrong, the team focuses on what happened rather than who to blame.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

7 Roles and responsibilities are clear enough that people know what they own.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

8 Underperformance or missed commitments get addressed directly, not avoided.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

Collaboration

Whether information, effort, and decisions genuinely flow across the team

9 Information flows freely across the team rather than being held by a few people.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

10 Team members actively help each other succeed, even outside their own workload.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

11 Decisions that affect multiple people are made with appropriate input, not in isolation.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

12 Conflict between team members gets resolved constructively rather than left to fester.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

Innovation Climate

Whether the team has genuine room to challenge, experiment, and learn from failure

13 New ideas are welcomed and given genuine consideration, even when they challenge the status quo.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

14 The team has enough space and time to experiment, not just execute.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

15 Failed experiments are discussed openly rather than quietly buried.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Strongly disagree Strongly agree

Team Scoring Guide

Add the scores for each dimension, then combine them for an overall total out of 75. If multiple team members completed this independently, average each question's score across respondents before totalling.

Dimension	Questions	Max Score	Your Score
Psychological Safety	4	$4 \times 5 = 20$	
Accountability	4	$4 \times 5 = 20$	
Collaboration	4	$4 \times 5 = 20$	
Innovation Climate	3	$3 \times 5 = 15$	
Overall Total	15	75	

OVERALL SCORE INTERPRETATION

65–75 Thriving Culture

This team shows strong signals across psychological safety, accountability, collaboration, and innovation. This is a genuine asset — protect it deliberately as the team grows or changes.

Development focus: Watch for complacency. Revisit this assessment periodically, especially after new hires join or the team's composition changes.

50–64 Healthy, With Room to Grow

The team has solid foundations but likely shows unevenness across dimensions — strong in some areas, weaker in others.

Development focus: Identify your lowest-scoring dimension specifically and focus development effort there rather than spreading attention evenly across all four.

35–49 Mixed Signals — Uneven Across Dimensions

Scores in this range often mean the team performs well on visible, task-related dimensions (like accountability) while struggling on less visible ones (like psychological safety).

Development focus: Look at the dimension breakdown, not just the total. A team can look accountable and still be unsafe to challenge or be honest in.

15–34 Foundational Issues Need Attention

Scores this low suggest the team's culture needs deliberate, sustained attention before performance improvements from other initiatives will fully take hold.

Development focus: Start with psychological safety before anything else — accountability, collaboration, and innovation are all much harder to build without it.

READ THE DIMENSIONS, NOT JUST THE TOTAL

Two teams can land on the same overall score for very different reasons. A team strong in accountability and collaboration but weak in psychological safety often looks healthy from the outside while people quietly hold back their real opinions. Look at your lowest-scoring dimension specifically — it usually explains more than the total does.

Action Planning Prompts

Scoring the assessment is the easy part. These prompts turn the results into something the team will actually act on.

Which dimension scored lowest for this team?

Name the dimension, and the single lowest-scoring question within it. That specific question, not the dimension label, is where the real signal is.

What's one specific behaviour — not an abstract value — that would move this dimension forward?

"Be more collaborative" is not actionable. "Share the weekly numbers with the whole team, not just managers" is.

What should this team stop doing, start doing, and keep doing based on these results?

Naming something to stop is often more powerful than adding something new — most teams are already stretched.

Who owns following up on this, and by what date?

An action with no owner and no date is a hope, not a plan. Name a person and a specific check-in point.

KEEP THIS LIVING

A culture assessment loses its value if it's completed once and filed away. Revisit it every two to three quarters, track whether your priority dimension is actually moving, and share the trend — not just a single snapshot — with the team.
